

HYALIQUE-X™

Advanced Cross-Linked Hyaluronic Acid Dermal Fillers

Precision • Structure • Hydration • Natural-Looking Contours

HYALIQUE-X™ is an advanced cross-linked hyaluronic acid dermal filler system designed for **facial volume restoration, contour definition, hydration, and structural enhancement.**

Its range of molecular weights and concentrations provides tailored solutions for different aesthetic requirements—from **soft tissue hydration and fine-line refinement to deeper structural support, lifting, and facial contouring.**

Product Specifications

Specification	Details
Product Name	HYALIQUE-X™
Product Type	Cross-Linked Hyaluronic Acid Dermal Filler
Technology	Cross-Linked HA
Available Volumes	1 mL & 2 mL
HA Concentrations	18 mg & 24 mg
Molecular Options	Small-Molecular & Large-Molecular HA
Origin	Republic of Korea
Manufacturer	Vesco Science Co., Ltd.
Intended Use	Professional Aesthetic Use

Why HYALIQUE-X™?

- Advanced **Cross-Linked HA Technology**
- Smooth and controlled injectability

- Excellent tissue integration
 - Tailored molecular-weight options
 - Deep hydration and structural support
 - Designed for natural-looking aesthetic results
 - Professional aesthetic applications
-

HYALIQUE-X™ Product Range

Variant	Volume	HA Concentration	Type	Primary Application
Small Molecular HA 1 mL	1 mL	18 mg	Soft Filler	Lips • Fine Lines
Large Molecular HA 1 mL	1 mL	24 mg	Hard Filler	Chin • Nose • Jawline
Small Molecular HA 2 mL	2 mL	18 mg	Soft Filler	Mid-face • Volume Restoration
Large Molecular HA 2 mL	2 mL	24 mg	Hard Filler	Facial Contouring

Two Molecular-Weight Technologies

Small-Molecular Hyaluronic Acid

Soft Filler

A low-viscosity formulation designed for smooth and even distribution within dermal tissue, supporting **hydration, flexibility, natural softness, and refined aesthetic enhancement.**

Ideal for:

Lips • Fine Lines • Mid-face • Volume Restoration

Large-Molecular Hyaluronic Acid

Hard Filler

A high-density, high-viscosity formulation designed for **lifting capacity, projection, shape retention, and structural support** in deeper tissue planes.

Ideal for:

Chin • Nose • Jawline • Facial Contouring

Key Benefits

Deep Hydration

Supports enhanced hydration and improved skin quality.

Facial Contouring

Provides structural support for refined facial definition.

Volume Restoration

Designed to restore volume while maintaining balanced facial proportions.

Lifting & Projection

Large-molecular formulations provide enhanced structural support, projection, and shape retention.

Fine-Line Refinement

Small-molecular formulations provide smooth tissue integration for delicate aesthetic enhancement.

Natural-Looking Results

Designed for balanced facial harmony and natural-looking aesthetic outcomes.

Treatment Areas

Small Molecular HA

- Lips
- Fine Lines
- Mid-face
- Volume Restoration

Large Molecular HA

- Chin
 - Nose
 - Jawline
 - Facial Contouring
