

BlueVive Booster™

ADVANCED PEPTIDE BIO-REMODELING BOOSTER

COPPER-ACTIVATED REGENERATIVE PEPTIDE COMPLEX

BlueVive Booster™ is an advanced regenerative skin booster combining Copper Tripeptide-1 (GHK-Cu) with Non-Crosslinked Hyaluronic Acid to support extracellular matrix renewal, stimulate collagen synthesis, improve skin hydration, and accelerate skin recovery.

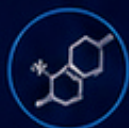

The synergistic formulation enhances peptide delivery while improving skin firmness, elasticity, texture, and overall skin quality for natural-looking rejuvenation.

KEY BENEFITS

Stimulates Collagen & Elastin Synthesis

Supports Extracellular Matrix (ECM) Regeneration

Enhances Skin Firmness & Elasticity

Improves Texture & Skin Quality

Accelerates Post-Procedure Recovery

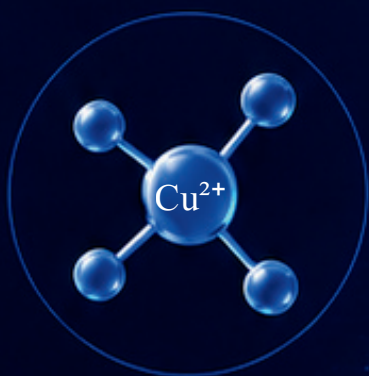

Supports Long-Term Skin Remodeling

POWERED BY

GHK-Cu

(COPPER TRIPEPTIDE)

A clinically recognized regenerative formulation combining Copper Tripeptide-1 (GHK-Cu) and Non-Crosslinked Hyaluronic Acid, designed to activate cellular repair pathways, stimulate collagen synthesis, restore skin hydration, and promote healthier, firmer, and more resilient skin.

HOW BLUEVIVE BOOSTER™ WORKS

BlueVive Booster™ combines Copper Tripeptide-1 (GHK-Cu) with Non-Crosslinked Hyaluronic Acid to create a synergistic regenerative system that supports natural cellular repair, extracellular matrix remodeling, collagen synthesis, and deep skin hydration.

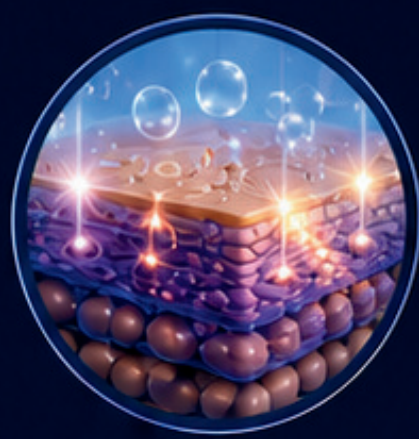

- BENEFITS:**
- ✓ Improved skin firmness
 - ✓ Reduced appearance of fine lines
 - ✓ Enhanced structural support

- BENEFITS:**
- ✓ Better elasticity
 - ✓ Improved skin bounce
 - ✓ More youthful appearance

- PROMOTES:**
- ✓ Collagen
 - ✓ Elastin
 - ✓ Glycosaminoglycans (GAGs)
 - ✓ Tissue remodeling factors

- IDEAL AFTER:**
- ✓ Microneedling
 - ✓ Exosome Therapy
 - ✓ RF Treatments
 - ✓ Laser Procedures
 - ✓ Mesotherapy

TREATMENT INDICATIONS

- Fine Lines & Wrinkles
- Skin Laxity
- Dull Skin
- Uneven Texture

- Aging Skin
- Post-Procedure Recovery
- Skin Quality Enhancement
